

Client:
Robinson & Grayson

900 Foulk Road Medical Center

Design Professional:
Design Collaborative

Location:
Wilmington, DE

Delivery Method:
Design-Build

Key Challenges:

- To create an architecturally alluring facility that would accommodate physician offices and laboratories as well as lounges and waiting areas.

Bancroft constructed a 30,000 square foot new facility to service North Wilmington. Tenant improvements included upgrades to various physicians' offices. The building was flexible in its ability to house diverse needs regarding suite sizes.
