

Client:

University of Delaware

Exelon Trading Center

Design Professional:

Read & Company Architects, Inc.

Location:

Newark, DE

Delivery Method:

General Contracting

Key Challenges:

- To construct an educational facility for the University of Delaware's Alfred Lerner College of Business and Economics that replicates trading floors found on Wall Street.
- To construct a dedicated server room to accommodate the IT support equipment necessary for this facility.

The Exelon Trading Center is a 2,200 square foot educational trading facility designed to replicate the trading floors found in investment banks, brokerage houses, and hedge funds on Wall Street. The Center incorporates the same computer hardware, software, networks, and market data feeds that are found in every financial institution throughout the world. The facility includes sixteen classroom workstations, four research room workstations, a dedicated server room, fire rated glass doors and walls, new dedicated HVAC equipment, ticker displaying NYSE activities, LCD displays and Lutron Lighting Systems, and an interactive teaching station.
