

Project Profile

Client:

Appoquinimink School District

Cedar Lane Elementary School

Design Professional:

The Diamond Group

Location:

Middletown, DE

Delivery Method:

General Contracting

Key Challenges:

- To complete construction of a new elementary school for the Appoquinimink School District in time for the start of the school year.

Cedar Lane Elementary School, a 63,000 square foot structure, was the first elementary school built in the Appoquinimink School District in more than 15 years. Approximately a quarter of the way through the project, the District determined that the school would be under capacity by the time it was constructed and decided to add another wing onto the building. Bancroft's Project Team was able to incorporate this substantial change and still have the project completed on schedule for the start of the school year.
